

SyncMaster 151MP SyncMaster 171MP

(For NTSC systems)
TFT-LCD Monitor

**Owner's
Instructions**

For Better Display

1. Adjust computer resolution and screen injection rate (refresh rate) in control panel of computer as described below to enjoy the best quality of picture. You can have an uneven quality of picture in the screen if the best quality of picture is not provided in TFT-LCD.
 - Resolution: 15" 1024 x 768 • Vertical frequency (refresh rate): 60 Hz
 - 17" 1280 x 1024
2. TFT LCD panel manufactured by using advanced semiconductor technology with precision of 99.999% above is used for this product. But the pixels of RED, GREEN, BLUE and WHITE color seem to be bright sometimes or some of black pixels could be seen. This is not from bad quality and you can use it without uneasiness.
 - For example, the no. of TFT LCD pixels that is contained in this product are 2,359,296 (15"), 3,932,160 (17").
3. When you clean the monitor and the panel outside, please apply the recommended small amount of cleaner by using soft and dry cloth and polish it. Let LCD area not to be forced but to be scrubbed out softly. If excessive force is applied, you can have a stain on it.
4. If you are not satisfied with the quality of picture, you can get better quality of picture by executing "auto adjustment function" in display screen that is appeared as window termination button is pressed. If there's still noise after automatic adjustment, use FINE/COARSE adjustment function.

Safety Instructions

- 1** Before connecting the AC power cord to the DC adapter outlet, make sure the voltage designation of the DC adapter corresponds to the local electrical supply.
- 2** Never insert anything metallic into the cabinet openings of the liquid crystal display (LCD) monitor; doing so may create the danger of electric shock.
- 3** To avoid electric shock, never touch the inside of the LCD monitor. Only a qualified technician should open the case of the LCD monitor.
- 4** Never use your LCD monitor if the power cord has been damaged. Do not allow anything to rest on the power cord, and keep the cord away from areas where people can trip over it.
- 5** Be sure to hold the plug, not the cord, when disconnecting the LCD monitor from an electric socket.
- 6** Openings in the LCD monitor cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Also, avoid using the LCD monitor on a bed, sofa, rug, or other soft surface. Doing so may block the ventilation openings in the bottom of the cabinet. If you put the LCD monitor in a bookcase or some other enclosed space, be sure to provide adequate ventilation.
- 7** Put your LCD monitor in a location with low humidity and a minimum of dust.
- 8** Do not expose the LCD monitor to rain or use it near water (in kitchens, near swimming pools, etc.). If the LCD monitor accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the LCD monitor with a damp cloth when necessary, but be sure to unplug the LCD monitor first.
- 9** Place the LCD monitor on a solid surface and treat it carefully. The screen is made of thin glass with a plastic front surface and can be damaged if dropped, hit or scratched. Do not clean the front panel with keton-type materials (e.g., acetone), ethyl alcohol, toluene, ethyl acid, methyl, or chloride – these may damage the panel.
- 10** Locate your LCD monitor near an easily accessible AC outlet.
- 11** If your LCD monitor does not operate normally – in particular, if there are any unusual sounds or smells coming from it – unplug it immediately and contact an authorized dealer or service center.
- 12** High temperature can cause problems. Don't use your LCD monitor in direct sunlight, and keep it away from heaters, stoves, fireplaces, and other sources of heat.
- 13** Unplug the LCD monitor when it is going to be left unused for an extended period of time.
- 14** Unplug your LCD monitor from the AC outlet before any service.

| CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. | | |

Unpacking Your Monitor

Please make sure the following items are included with your monitor. If any items are missing, contact your dealer.

Installation CD
(Not available in all locations)

Monitor

15-pin D-Sub Signal Cable

DC Adapter

Warranty Card
(Not available in all locations)

Remote Controller

Stereo Audio Cable

Manual

RCA DTV Cable
(option)

Power Cord

Batteries
(AAA x 2)

Tuner Box
(option)

Setting up Your LCD Monitor

Setting up an Ergonomic Workstation

Consider the advice given below before you install your monitor.

Monitor location

Choose a position that exposes your monitor to the least reflection from lights or windows, usually at a right angle to any window.

Workstation height

Place your LCD monitor so that the top of the screen is slightly below your eye level when you are comfortably seated.

Viewing angle

Tilt the screen until you feel comfortable working with your monitor.

Figure 1. Tilt the screen

Setting up Your LCD Monitor

Connecting Your LCD Monitor

Figure 2. Cable connections

1. Connecting Computer (① ② ③)

- A. Connect the power cord to the DC Adaptor and connect the adaptor jack to the DC 12V power connector on the back of the monitor.
- B. Connect the 15-pin D-SUB of the video signal cable to the PC video connector on the back of the monitor.
- C. Connect the stereo audio cable to "Audio (ST)" on the back of the monitor and the other end to "Audio Out" terminal of the sound card on your computer.
- D. If necessary, please install monitor driver contained on the accompanied CD. For driver installation, please refer "Installing Video Driver" section on page 7.

2. Connecting External A/V Devices (④ ⑤)

- A. Connect RCA (Yellow) or S-VHS cable to an appropriate external A/V device such as VCR, DVD or camcorder. (RCA cable and S-VHS cable not included)
- B. Connect RCA audio cables to "Audio (R)" and "Audio (L)" terminals and the other ends to corresponding audio out terminals on the A/V device. (Stereo-RCA cable not included)
- C. Headphone may be connected to the headphone output on the left-hand side of the monitor marked (⑥). **While the headphone is connected, the sound from the built-in speakers will be disabled.**

3. Connecting TV/CATV (⑦)

- A. Connect an antenna or CATV cable to the antenna terminal on the back of the monitor.
 - ☞ Optional TV tuner is required. The optional TV tuner can be purchased from the local Samsung Monitor dealers.

4. Connecting DTV Set-Top Box (⑧ ⑨ ⑩)

- A. Connect the RCA DTV Cable to the Video port of the DTV Function on the back of the monitor.
- B. Connect the RCA Cable to "Audio(L)" and "Audio(R)" on the back of the monitor and the other end to "Audio Out" terminal of the Set-Top Box.

Setting up Your LCD Monitor

Connecting TV Tuner Box (option)

- 1** Unplug the DC adapter.
- 2** Remove cover of tuner box housing by sliding down.
- 3** Connect antenna or CATV cable to "Antenna" port of the tuner box.

- 4** Insert the tuner box into tuner box housing on the back of the monitor. Please use a coin or screwdriver to tighten the two screws to fix the tuner.

- 5** Put the tuner box housing cover back on.

- 6** Connect the power cord of DC adapter then the monitor will be ready for TV function.

Setting up Your LCD Monitor

Plug and Play

The adoption of the new **VESA**[®] Plug and Play solution eliminates complicated and time consuming setup. It allows you to install your monitor in a Plug and Play compatible system without the usual hassles and confusion. Your PC system can easily identify and configure itself for use with your display. This monitor automatically tells the PC system its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the PC system can automatically configure itself to use the flat panel display. If your PC system needs a video driver, follow the instructions given below according to the operating system your computer uses.

Installing the Video Driver

The CD that accompanies this product contains the necessary drivers for installing your monitor. Please refer to the driver installation instructions included with your CD package for more information.

Self-Test Feature Check (STFC)

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. Make sure that PC is selected as a primary source by checking if the source indicator LED labeled "PC" is on. If your monitor and computer are properly connected but the monitor screen remains dark and the power indicator is blinking, run the monitor self-test by following the steps given below:

Figure 3. Power Indicator

- 1** Turn off both your computer and the monitor.
- 2** Unplug the video cable from the back of the computer.
- 3** Turn on the monitor.

Setting up Your LCD Monitor

If the monitor is functioning properly, you will see a white box with a large blue oval Samsung logo and an error message "Check Signal Cable." in red color.

Figure 4. Monitor self-test screen

This box also appears during normal operation if the video cable becomes disconnected or damaged.

- 4 Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after following the previous procedure, check your video controller and computer system; your monitor is functioning properly.

Getting Help

If your monitor does not display an image, check your cable connections and refer to "Troubleshooting" on page 30. If you experience difficulties with the quality of the displayed image, push Auto Button (see page 9) and refer to "Adjusting Your LCD Monitor" on page 9 or "Troubleshooting" on page 30.

Warm-up Time

All LCD monitors need time to become thermally stable whenever you turn on the monitor after letting the monitor be turned off for a couple of hours. Therefore, to achieve more accurate adjustments for parameters, allow the LCD monitor to warm (be on) for at least 20 minutes before making any screen adjustments.

Adjusting Your LCD Monitor

User Controls

Your LCD monitor allows you to easily adjust the characteristics of the image being displayed. All of these adjustments are made using the control buttons on the front of the monitor. While you use these buttons to adjust the controls, an OSD shows you their numeric values as they change.

* 17" : SyncMaster 171MP

Figure 5. User control locations

| No. | Name | Description |
|-----|----------------|---|
| 1 | PC | <ul style="list-style-type: none"> ■ Selects PC source. ■ PIP window off. |
| 2 | PIP | <ul style="list-style-type: none"> ■ Activates PIP(Picture-in-Picture) window directly in PC mode. ■ Selects video sources (Video/S-video/TV). |
| 3 | Video | <ul style="list-style-type: none"> ■ Activates full screen video window. ■ Selects video sources (Video/S-video/TV). |
| 4 | Audio | <ul style="list-style-type: none"> ■ Selects audio source (PC/Video/TV). |
| 5 | Power | <ul style="list-style-type: none"> ■ Turns ON/OFF the monitor. ■ Indicates the status of the monitor. - Green : Normal Operation. - Amber : Power Saving Mode or Disconnected Signal Cable. |
| | ▼ ▲ - CH + | <ul style="list-style-type: none"> ■ Moves the selector up or down on the OSD. ■ Increases or decreases the channel number. |
| | ◀ ▶ - VOL + | <ul style="list-style-type: none"> ■ Moves the selector left or right on the OSD. ■ Increases or decreases the values of the selected function. ■ Increases or decreases the level of audio volume. |

Adjusting Your LCD Monitor

| No. | Name | Description |
|-----|--|--|
| 6 | Menu  | <ul style="list-style-type: none"> Opens the OSD and selects the highlighted function. |
| 7 | Exit | <ul style="list-style-type: none"> Exits from menus and sub-menus. Exits from the OSD system. |
| 8 | Auto | <ul style="list-style-type: none"> "Auto" allows the monitor to self-adjust to the incoming video signal. The values of fine, coarse and position are adjusted automatically. |

Automatic Save

Whenever you open the OSD and allow an adjustment window to remain active for about 3 seconds without pressing other buttons, the monitor automatically saves any adjustment you have made. These changes are saved into a user area in the monitor.

The monitor can save adjustments for up to 5 user modes. It has 9 for 151MP (11 for 171MP) factory preset or preload modes, one for each signal frequency as listed in table 7 on page 36. If you have made no adjustments, the OSD disappears and the monitor does not save anything.

Direct-Access Features

While you are watching full screen TV or in PIP mode

| | | |
|----------------|---|---|
| Program |  | <p>Valid only after performing "Channel auto program". When OSD is not on the screen, push the "▼" or "▲" button to select program channel number.</p> <ol style="list-style-type: none"> Push the "▼" button to decrease channel number. Push the "▲" button to increase the channel number. |
| Volume |  | <p>When OSD is not on the screen, push the "◀" or "▶" button to adjust volume.</p> <ol style="list-style-type: none"> Push the "◀" button to decrease the volume. Push the "▶" button to increase the volume. |

Adjusting Your LCD Monitor

OSD Lock/Unlock

While OSD window is not on, push and then hold Menu button for about 5 seconds to Lock or Unlock OSD menus. When OSD menus are locked, all OSD menus are disabled and colored in gray to indicate that those functions are not accessible but the following functions:

1. PC
 - Brightness
 - Contrast
2. TV
 - Channel
 - Volume
3. Control buttons
 - Direct access keys: PC, PIP, Video, Audio, Channel, Volume, Menu, Exit, Auto
4. Remote Controller
 - All direct access keys on the remote controller

Initial OSD icons

Depending on the configuration of the monitor, the appearance of OSD is different.

Fig. 6. With Optional TV Tuner

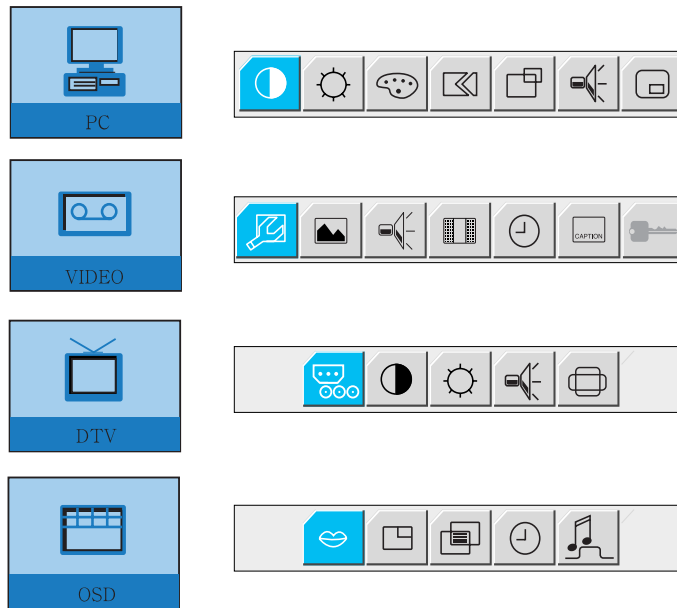

Fig. 7. Without Optional TV Tuner

- ⇒ The optional TV tuner can be purchased from the local Samsung Monitor dealers. Some OSD menus are disabled in gray color when they are not available in a certain mode of operation. Those menus are enabled when corresponding OSD menus are activated.

Adjusting Your LCD Monitor

On Screen Display (OSD)

Accessing the menu system

- 1** With the OSD off, push the **Menu** button to display the main OSD menu.
- 2** Use the "▼▲◀▶" buttons to move from one function to another. As you move from one icon to another, the function name changes to reflect the function or group of functions represented by that icon. See Table 1 starting on the next page to view a complete list of all of the functions available for the monitor.
- 3** Press the **Menu** button once to activate the highlighted function, then follow the Tool Tips to select the function and adjust the value.
- 4** Use "▲" and "▼" buttons to select the sub-menu, and press the **Menu** button once to activate the selected sub-menu.
- 5** After selecting a function, use the "◀" and "▶" buttons to make necessary adjustments. The setting bar moves and the numeric value indicator changes to reflect your adjustments.

NOTE: The numeric value indicator is provided as a point of reference only and has nothing to do with a real measurement.

- 6** Push the **Exit** button a couple of times to return to the main menu to select another function or to exit from the OSD.

The screen will blink once as the password is reset to the original state. • The initial password of V-Chip is '0000'. |

* According to our R&D Lab test result, "Channel auto program" usually takes around 3 minutes to scan 61 channels. The scanning can be longer or shorter depending on the number of channels and the video source whether the video source is from cable or air.

*Upon completion of "Channel auto program", the result of the channel search is stored in designated internal memory. Each found channel is indexed into that memory and the channel indices are used as a look up table. In other words, when a user changes the channel, the monitor refers to the look up table to find the appropriate channel frequency instead of performing physical frequency scanning which gives a lot slower tuning result. In rare cases, "Channel auto program" may miss a channel due to weak signals or for other reasons. To add a channel, please enter the channel number by using the numeric key pads on the remote controller, then use "Fine Tune" menu in the "TV Setup" menu from OSD. When you finish fine tuning the channel you want to add, select "Save".

Appendix

V - Chip (US only)

The Telecommunications Act of 1996 in USA requires that every television made, starting in 1998, must be equipped with the technological device named V - Chip. The V - Chip can block certain rated television shows off television (if chosen) so children cannot watch programs that their parents do not approve. With this device, program-rating information will be transmitted along with the television signal, and be decoded by the chip in each television. The chip will then compare the rating codes to values preset by the viewer, which is meant to be the parents. If the rating codes are higher than the preset values, the television signal will be blocked, and a blank screen will be displayed.

SyncMaster 151MP/171MP have this feature and you can adjust the V - Chip setting via OSD. Use arrow keys on the remote controller or control buttons on the front cabinet of the monitor to change the setting.

1. Select V - Chip on OSD, then enter 4 digits of pin number.
 - Initial pin number is "0000"
 - If you enter an incorrect pin number "Incorrect" message will be displayed for 3 seconds.
2. Use arrow keys to change or to activate the highlighted function.
3. Setting up **TV Guidelines**
 - Use Up/Down/Left/Right arrow buttons to move around the matrix and press **Menu** button to change the value from "U" to "B" or "B" to "U"
 - **U** : Unblock **B** : Block

Appendix

4. Setting up MPAA rating Mode

- Use Up/Down/Left/Right arrow buttons to move around the matrix and press **Menu** button to change the value from "U" to "B" or "B" to "U".
- MPAA : Motion Picture Association (of) America [movie rating organization]

| | | |
|--------------|---|-------------------------------|
| G | U | General Guidance |
| PG | U | Parental Guidance Suggested |
| PG-13 | U | Parents Strongly Cautioned |
| R | U | Restricted Under 17 Requires |
| NC-17 | U | No Children Under 17 Admitted |
| X | U | Adult Only |
| NR | U | Not Rated |

5. Entering a new pin number

- Use numeric keys enter a new pin number. Pin number confirm menu appears.
- Again, use numeric keys to enter the pin number you entered at the previous step. If the two pin numbers do not match, "Incorrect" message will be displayed for 3 seconds.

6. Blocking Screen

- If the incoming signal's rating is higher than the one specified, the screen will be blanked and "Excessive rating" message will be appeared.

*NOTE: When the screen is blocked by V-Chip, and if you forget the password of the V-Chip setting, press the **AUDIO** button in 10 second on the front cabinet of the monitor and it returns the '0000' default value.*

Thus, depending on the types of audio, the monitor automatically changes its audio mode from Mono to Stereo or vice versa.</i></p> |

Appendix

PowerSaver

This monitor has a built-in power management system called PowerSaver. This system saves energy by switching your monitor into a low-power mode when it has not been used for a certain period of time. The available modes are "On", "Standby", "Sleep", and "Deep Sleep". PowerSaver operates with a VESA DPMS compliant video card installed in your computer. You use a software utility installed on your computer to set up this feature. See Table 2 below for details.

Table 2. Power-saving modes

| State | Normal Operation | Power-Saving Function mode (EPA/ NUTEK/ ENERGY2000) | | |
|----------------------------------|--|--|--------------------------------------|------------------------------------|
| | | Standby Mode | Sleep Mode Position A1 | Deep Sleep Mode Position A2 |
| Horizontal Sync Vertical Sync | Active Active | Inactive Active | Active Inactive | Inactive Inactive |
| Power Indicator | Green | Amber | Amber Blinking (0.5 sec interval) | Amber Blinking (1 sec interval) |
| Power Consumption | 151MP : 40W (Max.) 171MP : 52W (Max.) | Less than 3W | Less than 3W | Less than 3W |

NOTE: This monitor automatically returns to normal operation when horizontal and vertical sync return. This occurs when you move the computer's mouse or press a key on the keyboard.

This monitor is EPA ENERGY STAR[®] compliant and NUTEK/ENERGY2000 compliant when used with a computer equipped with VESA DPMS functionality.

For energy conservation, turn your monitor OFF when you are not using it or when leaving it unattended for long periods.

Appendix

Troubleshooting

If you have a problem setting up or using your LCD monitor, you may be able to solve it yourself. Before contacting customer service, try the suggested actions that are appropriate to your problem.

Table 3. Troubleshooting – Image

| What you see... | Suggested Actions | Reference |
|---|---|--|
| Screen is black and power indicator is off | <ul style="list-style-type: none"> ■ Ensure that the power cord is firmly connected and the LCD monitor is on. | Connecting your LCD monitor, page 5. |
| “ Check Signal Cable” message | <ul style="list-style-type: none"> ■ Ensure that the signal cable is firmly connected to the PC or video sources. ■ Ensure that the PC or video sources are turned on. | Connecting your LCD monitor, page 5. |
| “Sync. Out of Range” message | <ul style="list-style-type: none"> ■ Check the maximum resolution and the frequency of the video adaptor. ■ Compare these values with the data in the Display Modes Timing Chart. | Display Modes, page 36. |

Display Modes

If the signal from the system equals to the standard signal mode, the screen is adjusted automatically. If the signal from the system doesn't equal to the standard signal mode, adjust the mode with referring to the Videocard user guide because the screen might not display or only the power LED might be on. For the display modes listed below, the screen image has been optimized during manufacture.

Table 7. Preset timing modes

Appendix

Attaching a wall or Arm mounting device

The monitor supports VESA mounting standard for use with various VESA mounting devices. To install any VESA mounting device, please follow the instructions given.

Case 1.

- 1** Lay the LCD monitor face-down on a flat surface with a cushion or other soft materials to protect the screen.
- 2** Remove all cables connected to the monitor.
- 3** Press "FOLD" button on the stand and tilt the monitor backward until the stand is folded in the monitor.
- 4** Connect all cable you removed at step 2.
- 5** Now you are ready to install Wall/Arm mounting device depending on your applications.

Case 2.

- 1** Lay the LCD monitor face-down on a flat surface with a cushion or other soft materials to protect the screen.
- 2** Remove all cable connected on the monitor.
- 3** Remove the four screws and then remove the Stand from the LCD monitor.
- 4** Connect all cable you removed at step 2.
- 5** Now you are ready to install Wall/Arm mounting device depending on your applications.

Appendix

Installing VESA compliant mounting devices

Refer to page 37 to fold the base.

Align the mounting interface pad with the holes in the rear cover mounting pad and secure it with the four screws that came with the arm-type base, wall mount hanger or other bases.

Wall Mount Instructions

The following instructions apply to a hollow sheet-rock wall only Tools/Hardware needed - Phillips screwdriver, four toggle bolts, 5/8in dia. Drill bit and drill. Contact Ergotron at (800) 888-8458 to purchase the triple pivot direct mount adapter and wall mount bracket kit.

- **151MP (15")** : No. 47 - 007 - 099 (Pivot direct mount adapter)
No. 97 - 101 - 003 (Wall mount bracket kit)
- **171MP (17")** : No. 47 - 007 - 099 - 02 (Pivot direct mount adapter)
No. 97 - 101 - 003 - 00 (Wall mount bracket kit)

Align the wall mount bracket on the wall at the desired height, making sure that the bracket will be mounted between the wall studs. Mark the four corner openings and drill four 5/8-dia. holes.

Assemble the wall mount kit according to the instructions provided with it.

Securely attach Ergotron's flat panel, triple pivot direct mount adapter to the back of the monitor using the four 4mm, .7 pitch x 10mm screws provided with the arm.

Secure the assembly to the wall using four 3/16 by 3-inch long toggle bolts.

Appendix

Retractable Stand

*NOTE: The maximum tilt angle is 15 degree to the backward direction. Please do not tilt the monitor other than specified range. **Excessive force to tilt the monitor other than specified range may give permanent damage to the mechanical part of the stand.***

Maintenance of Your LCD monitor

WARNING: To avoid risk of electric shock, do not disassemble the monitor cabinet (except for gaining access to the cable connectors as described on page 5). Users cannot service the monitor. User maintenance is restricted to cleaning as explained below:

Unplug the monitor from the power outlet before cleaning.

- To clean your flat panel display screen, lightly dampen a soft, clean cloth with water or mild detergent. If possible, use a special screen cleaning tissue or solution suitable for the antistatic coating.
- To clean the monitor cabinet, use a cloth lightly dampened with a mild detergent.
- Never use flammable cleaning material to clean your LCD monitor or any other electrical apparatus.

Regulatory Information

FCC Information

User Instructions

The Federal Communications Commission Radio Frequency Interference Statement includes the following warning:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television receptions, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

User Information

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

If necessary, consult your dealer or an experienced radio/television technician for additional suggestions. You may find the booklet called How to Identify and Resolve Radio/TV Interference Problems helpful. This booklet was prepared by the Federal Communications Commission. It is available from the U.S. Government Printing Office, Washington, DC 20402, Stock Number 004-000-00345-4.

Warning

User must use shielded signal interface cables to maintain FCC compliance for the product.

Declaration of conformity for products Marked with FCC Logo

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The party responsible for product compliance:

SAMSUNG ELECTRONICS CO., LTD
America QA Lab of Samsung
85 West Tasman Drive
San Jose, CA 95134 USA
Tel) 408-544-5124
Fax) 408-544-5191

Provided with this monitor is a detachable power supply cord with IEC320 style terminations. It may be suitable for connection to any UL Listed personal computer with similar configuration. Before making the connection, make sure the voltage rating of the computer convenience outlet is the same as the monitor and that the ampere rating of the computer convenience outlet is equal to or exceeds the monitor voltage rating.

For 120 Volt applications, use only UL Listed detachable power cord with NEMA configuration 5-15P type (parallel blades) plug cap. For 240 Volt applications use only UL Listed Detachable power supply cord with NEMA configuration 6-15P type (tandem blades) plug cap.

IC Compliance Notice

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations of ICES-003.

Cet appareil Numérique de classe B respecte toutes les exigences du Règlement ICES-003 sur les équipements produisant des interférences au Canada.

MPR II Compliance

This monitor complies with SWEDAC(MPR II) recommendations for reduced electric and magnetic fields.

European Notice

Products with the CE Marking comply with both the EMC Directive (89/336/EEC), (92/31/EEC), (93/68/EEC) and the Low Voltage Directive (73/23/EEC) issued by the Commission of the European Community. Compliance with these directives implies conformity to the following European Norms:

- EN55022:1998 – Radio Frequency Interference
- EN55024:1998 – Electromagnetic Immunity
- EN61000-3-2:1995 + A1 + A2 – Power Line Harmonics
- EN61000-3-3:1995 – Voltage Fluctuations
- EN60950 – Product Safety.
